

SPECIAL NOTICES

Whereas the mournful intelligence has reached us of the death, in the midst of the sorrow of the loss of the late Robert O. Holtzman, esq., one of the directors of this company; therefore be it

Resolved, That our late associate and friend, Robert O. Holtzman, esq., from his birth and with this company for over six years, possessed in an eminent degree the qualities that won the respect of all with whom he came in contact. His high character, sincerity, sterling integrity, and courteous demeanor will long be remembered by his many friends.

And that the fellow-directors, his advice, and sound judgment were greatly valued as was his friendship highly prized.

We mourn the loss of one whose presence will be missed and whose place cannot be readily filled.

Resolved, That a copy of these resolutions be communicated by the secretary to the friends of the deceased, and published in the daily papers of the "City and County of New York."

LIQUID AIR FOR BLASTING

Experiments Made Before Aust
Army Engineers.
(From the New York Tribune.)
A series of tests of liquid air were

a few weeks ago by the Vienna Crystallographic Company in the presence of representatives of the Austrian Technical Ministry Committee. The fluid was obtained from Linde's works in Munich, and conveyed to Vienna in open flasks, having the Dewar vacuum jacket to check evaporation. When it was despatched the mixture contained

is per cent of oxygen, but seventy hours later, when the stuff was enough nitrogen had evaporated to the percentage of oxygen 85.

Cartridges were made of liquid mineral oil (petroleum), and Kiesel. The oil seems to have taken the place of charcoal in gunpowder, in supplying

inflammable material which would develop a large quantity of gas. The liquid was almost pure oxygen, and tended to promote combustion. The Kieselguhr served the same purpose that it does dynamite. It is a siliceous earth, used as an absorbent to hold the nitro-glycerine. The cartridges are spoken of technically

They were prepared in two ways. In the Kieselguhr and oil were mixed in a basin, and the liquid air was added gradually. The resulting paste was ladled into the cartridge case, which was coated with asbestos, probably to check the absorption of heat from the surroundings.

Owing to the intense cold, the men took great care to handle the cartridge vigorously.

and there was difficulty in attaching tonators and fuses. In the meantime the oxygen evaporated, especially the cartridges having lead cores. The latter proved weaker than the first. One of them missed fire altogether. The cartridges were inserted in holes 10 inches deep in the rock when fired.

The preparation of the cartridge was found to be wasteful, and dangerous to the eyes, owing to the rapid evaporation. It is therefore impossible to guarantee the strength of the cartridge, even in the roughest tests. Kieselguhr and oil seem to be suitable.

sorbents and oxyignite an effective
ing agent, though comparative tests
not been made yet. The cartridges
be used within, say, fifteen minute
their preparation. There is no dan
hence, from missing fire. But, on the
er hand, it will be difficult to fire
cartridges simultaneously and, s

speaking, the cartridges should be on the spot, and be in a very hard condition. That would scarcely be possible on low ground; the spurting liquid break the glasses of the hot safety lamp, and it remains to be investigated whether the large volumes of oxygen might lead to spontaneous ignition of material.

The Incense Trade.
(From the Daily Graphic.)

decision of the Archbishop with regard to use of income in Anglican churches will have no appreciable effect on the trade in that country. At most of the Anglican churches income would be used only four times a year, a very small quantity of income is required for entire service. As far as can be ascertained, an Anglican church would spend more than 100 times as much on income, and the entire trade is paid for by the government.

Hard Winter Predicted.
The forecasters of a hard winter are their usual predictions. The squirrels are

away large quantities of seeds, the marks
trees are thicker than usual, the corn husks
tighter on the ear, the birds are flying soon
earlier and more rapidly, the angle-worm is
deeper into the ground, and animals are
wearing thicker coats of hair and fur. Many
regard this as sure evidence of a hard
winter. Perhaps there may be a hard winter;
yourself, and be in good health to withstand
sudden change by drinking plenty of Ho-

beer. Those who think they are in need of tonic will find Heurich's invaluable, for it is the best of all nerve and muscle foods, and of great endurance to those who use it in moderation. Can be had by calling for Heurich's, Zen, Senate, and Lager at all leading hotels, restaurants, and also by 'phoning 634, Ar. Bottling Company, for a case.
